FRAMEWORK SOLUTION TO DEVELOP TODONOTES

I would use Hybrid APP Development,

The APP has low requirements, It is cheaper than others , Faster initial speed to market so its better and we can use the same code on multiple platforms. So Hybrid APP development is the best for this occasion.

WHAT ARE THE CONSIDERATIONS DONE WHEN DECIDING A MOBILE APPLICATION FRAMEWORK?

1. Development costs
2. Time to market
3. Maintaining costs
4. Performance
5. Availability
6. Security
7. Hiring
8. UX UI design

NATIVE APP DEVELOPMENT

PROS	CONS
Flawless Performance	Initially Higher Costs
Ability To Work Offline	Complex Maintenance
Better Security & Reliability	Need Tech Specialists

HYBRID APP DEVELOPMENT

PROS	CONS
Faster Development	User Experience issues
Easier Development	Performance issues
Cost Efficient For Simple Projects	Lack of intergrity with a device

PROGRESSIVE WEB APPS

PROS	CONS
Can Be Used Offline	Support For Offline Execution Is However Limited
Can be Installed On Mobile Home Screens	Lack Of Presence On The Stores
Can Use Web Push Notifications	Limited Access To Some Hardware Components Of The Devices

A VALUE-ADDED FEATURE FOR "TODONOTES

Sync between every platform and device you use

Which platforms is going to depend on what you personally use, but we didn't consider anything that doesn't sync between desktop and mobile.

Feature to login and use the app so you can log on from any device and check your todolist from anywhere.

FAVORITE MOBILE APPLICATION

Spotify

Spotify is an advanced music, webcast, and video spilling administration that gives you access to a large number of melodies and other substance from specialists everywhere throughout the world. Fundamental capacities, for example, playing music are thoroughly free, however you can likewise decide to redesign to Spotify Premium. In any case, you can:Choose what you want to listen to with **Browse** and **Search**.

1. Get recommendations from personalized features, such as **Discover Weekly**, **Release Radar**, and **Daily Mix**.

2. **Build Collections of music**.

3. See what **friends, artists and celebrities** listen to.

4. Create your own **Radio Stations**.

Spotify is available across a range of devices, including computers, phones, tablets, speakers, TVs, and cars, and you can easily transition from one to another with **Spotify Connect**.
